4. DESCRIPTION OF THE SITE

4.1. General characteristics

<i>Cod</i>	<i>%</i>	<i>CLC</i>	<i>Habitat classes</i>
N14	5	231	Pastures
N15	18	242, 243	Arable fields
N17	70	312	Coniferous forests
N19	2	313	Mix forests
N26	5	324	Forest habitats (transition forests)

Other characteristics of the site:

4.2. Quality and importance:

The proposed area includes large spruce fir and mix (beech) forests, with species characteristic to these habitats, 3 species of owls, 3 species of woodpeckers, etc.

In the West side of the site, especially close to the human settlements, there are many hey fields where the field corncrake (*Crex crex*) nests. Ornithological research is needed to point out the importance of the area for the birds.

4.3. Vulnerability:

1. Uncontrolled tourism
2. Mass tourism
3. Changing the seminatural habitat (hey fields, pastures) because of agricultural activities
4. Prolonged work in the area of the nesting
5. Hunting during nesting season
6. Hunting in the areas of nesting
7. Practicing extreme sports: climbing, , enduro, motocross, field cars

4.4. Designation of the site (see the observations on the quality dates above):

4.5. Type of propriety:

4.6 Documentation:

Milvus database.

4.7. History (this will be completed by the Committee)

Date	Modified field	Description
------	----------------	-------------

5. STATUS OF PROTECTION OF THE SITE AND THE LINK WITH CORINE BIOTOPE SITES

5.1. Clasification at national and regional level

5.2. Relations with other protected areas - designated at national or regional level

Code	Category	Type	%	National code and the name of the protected area
RO04	Natural reservation	=	100,00	2.726. – Dragomirna Forest

5.3. Relations with Corine biotop sites

Code	Overlap	%	Name
J021SV	*	6.4	BOTUS - BOBEICA

6. ARTIFICIAL ACTIVITIES AND THEIR EFFECTS ON THE SITE AND SUROUNDINGS

6.1. Artificial activities, their consequences and the surface of the site that has been affected

- Activities and consequences inside the site

Code	Activity	Intensity	%	Influence
------	----------	-----------	---	-----------

6.2 Management of the site

Organism responsible with the site management:

Management plan:

7. SITE MAP

Psychical Map, Scale, Protection:

Specify if the limits are available in digital:

Specify if there are photographs from ar:

The Digital Map of Romania (raster and vector), 1:50.000, Stereo 1970

Yes, in ESRI .shp format, in national protection Stereo 1970

There are no air photographs included
